PROFESSIONAL PROFILE

Software developer with experience in DevOps using WINDEV and full-stack web development with Node.js, as well as Linux server and database administration (HFSQL, MySQL). I specialize in designing, implementing, and maintaining tailored business solutions, combining expertise in programming, IT infrastructure, and cybersecurity.

I stand out for my fast learning ability, logical-mathematical thinking, and responsibility in delivering results.

SKILLS

- Fast learning and problem-solving.
- Organization, responsibility, and autonomy in projects.
- Experience in system integration and technical support.
- Logical-mathematical thinking applied to development.

WORK EXPERIENCE

Eurogen S.R.L., B&V Importaciones S.R.L. - Software Developer & IT Consultant
